

Программное обеспечение «Gaia 3D»

[перейти на сайт ⇒](#)

Путешествие в стерео мир Gaia 3D более захватывающий и реалистичный, чем просмотр 3D фильма в кинотеатре. Можно с уверенностью сказать, что использование 3D учебного материала влияет на уровень знаний учеников, а в большей мере влияет на заинтересованность учащихся в обучении, сосредотачивают их внимание на предмете. Некоторые предметы гораздо легче изучать, если их можно визуализировать.

Представление материала в 3D формате позволяет ученикам повысить понимание сложных вопросов посредством наблюдения и обозрения, а не осмысления содержания учебника, это упрощает сложные вопросы, ускоряет процесс обучения да просто позволяет получать удовольствие от обучения.

Есть несколько новых интерактивных сред, включая: путешествие по тропическим лесам, сплав по Амазонке и изучение различных видов растений и животных во время путешествия.

Gaia 3D имеет более, чем 2000 моделей в своих средах и учебной программе.
